KHOURIBGA, MOROCCO

EDUCATION

ISTA ISGI, KHOURIBGA

OCT 2021 – JUL 2023

Full Stack Web Development Diploma (Bac+2). Coursework included modern frontend and backend tools with agile project management and delivery methodologies.

Technologies: HTML5, CSS3, JavaScript, React, REST APIs. Databases and tools: MySQL, MongoDB, Git.
Project: Built a complete marketplace-style web app with user accounts, CRUD operations, and a mobile-friendly layout.

1337 CODING SCHOOL, KHOURIBGA

NOV 2023 – PRESENT

Intensive project-based curriculum covering algorithms, systems programming, networking, and full-stack development.

Technologies: C, C++, TypeScript, Next.js, Fastify, Docker, Linux, Git

Key Project – **ft_transcendence**:

Full-stack Pong web application developed with Next.js and Fastify. Built backend APIs and worked extensively on fetching and processing data to display interactive graphs and dashboards for a smooth user experience. Implemented real-time interactions using WebSockets, user authentication, and a blockchain component to ensure data integrity. Participated in peer code reviews, collaborative problem-solving, and technical presentations.

SKILLS AND EXPERTISE

Programming & Languages:

C, C++, TypeScript, JavaScript, SQL

Frontend Development:

React, Next.js, Tailwind CSS, data visualization (graphs, charts), responsive UI design

Backend Development:

Node.js, Fastify, REST API development, WebSockets, authentication, role-based access control, secure API design

Database & Data Management:

MySQL, MongoDB, database schema design, query optimization, data fetching & processing

System & Networking:

Linux, Docker, networking fundamentals, process & memory management, system programming, signal handling

Tools & Workflow:

Git, GitHub, VS Code, peer code reviews, collaborative development

LANGUAGES

Arabic: Native | **English:** Advanced (C1) | **French:** Intermediate
