Education

1337 Coding School

42 curriculum , software engineering
Common core graduate.

Khouribga, Ma
2023 - 2028

ISTA ISGI

Full stack web development
Bac+2 Diploma

Khouribga, Ma
2021 - 2023

Projects

Web

- **ft_transcendence:** Full-stack Pong web application built with Next.js and Fastify. Developed backend APIs, interactive dashboards, real-time features using WebSockets, authentication, and blockchain-based data validation.
- **Api Watch:** Monitoring platform for APIs, servers, and CDNs, featuring response time monitoring, incident detection, and email/Discord alerts, built with Next.js, NestJS, PostgreSQL.
- **1337 Vacations:** Built a vacation management front-end, for 1337 school students using React js.

Systems and networking

- **Minishell:** A fully functional POSIX-compliant shell built from scratch. Implements lexing, parsing, heredocs, pipes, redirections, signals, and built-in commands, built in C.
- **CUB3D:** 3D raycasting game, built from scratch with C and Mlx library, Features textured walls, sprites, rendering calculations, and collision systems.
- **IRC server:** Internet relay chat server supporting multiple clients, channels, operators, real-time messaging via non-blocking I/O, and FTP, Built with C++.

Skills & expertise

Programming Languages: C, C++, Javascript, TypeScript.

Frameworks: NextJs, NestJs, Fastify

Databases: Mysql, postgres, MongoDB

Systems & Networking and tools: Linux, Docker, Git, networking fundamentals, low-level knowledge(process & memory management, system and multi-threading programming).

Language: English : Advanced (C1), French Intermediate (B2)
